PROFILE SUMMARY

Graduated with a Bachelor's degree in Software Engineering, passionate about backend development. Experienced in building full-stack web applications using ASP.NET Core, Entity Framework, and SQL Server. Completed internship at FPT Telecom, working with microservices architecture, Redis, and Kafka. Contributed to the FPTNG Platform project for 3 sprints, gaining hands-on experience with the Scrum process and the full software development lifecycle. Implemented CI/CD pipelines using Bitbucket and Google Cloud. Proactive, quick learner, and eager to grow in a professional software development environment.

CAREER OBJECTIVES

- Short-term: To join a dynamic development team and strengthen my skills in building secure, scalable backend systems using modern technologies like ASP.NET Core and SQL Server.
- Long-term: To become a Senior Backend Developer and acquire PMP certification to lead and deliver impactful tech-driven projects.

TECHNICAL SKILLS

- Languages: C#, Javascript.
- Frameworks & Libraries: ASP.NET Core, Entity Framework Core, ABP Framework, Express.js
- Databases: SQL Server, Oracle, MongoDB.
- Tools & IDEs: Visual Studio, VS Code, SSMS 19, GitHub, Jira, Docker.
- Others: SignalR, Socket.IO, RESTful APIs, Microservices architecture, CI/CD, HTML, CSS.

WORK EXPERIENCE

FPT NG – FullStack Developer (Remote) (07/2025 – now)
- Developed RESTful Web APIs using ASP.NET Core, ABP Framework.
- Built web interfaces using TypeScript with Vite.
- Implemented the Domain-Driven Design (DDD) and contributed to system architecture analysis.
- Worked with Microsoft SQL Server databases.
- Managed source code using GitBucket, including committing changes, creating merge requests for code reviews, and setting up CI/CD pipelines.

FPT Telecom – Backend Developer Intern (04/2025 – 07/2025)
- Developed and maintained RESTful Web APIs using ASP.NET Core, following a microservices architecture.
- Implemented the MediatR pattern and contributed to system architecture analysis.
- Integrated Kafka for real-time event streaming and inter-service communication
- .Worked with Oracle Database: wrote PL/SQL queries and stored procedures for complex data operations.
- Managed source code with GitLab: committed changes and created merge requests for code reviews.

CERTIFICATIONS

- Git & GitHub Mastery – Udemy
- English Proficiency – B1 (CEFR)
